vision:

Laica is committed to designing innovative products that deliver against consumer needs with a focus on environmental demands for a sustainable future.

mission:

LAICA is committed to offering functional products that support people's everyday lives.

values:

LAICA is committed to respecting the environment through the research and development of products made with eco-sustainable materials and is involved in various social projects.

LAICA, specialists in water
filtration for domestic use for
more than twenty years

Filtration

bi-flux® filters cartridges

The bi-flux® filter lasts for 150 L, the equivalent of 1 month of filtered water.

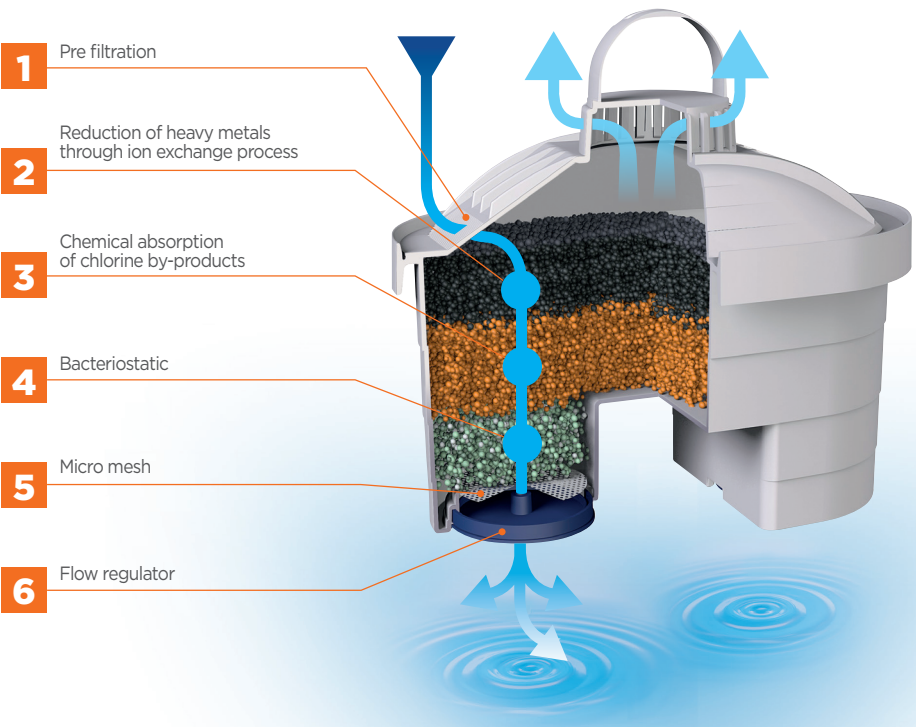

UNIVERSAL

The bi-flux® filter cartridge is an exclusive LAICA patent. Thanks to the bi-flux® filter cartridge, made entirely in Italy, the water is filtered to improve the taste, preserving the mineral salts that are beneficial to the body, present in the mains water supply and reducing the hardness of the water.

- The bi-flux® cartridge reduces:
- hardness
 - heavy metals
 - chemical contaminants
 - chlorine
 - trihalomethanes
 - some chlorine-based pesticides and herbicides

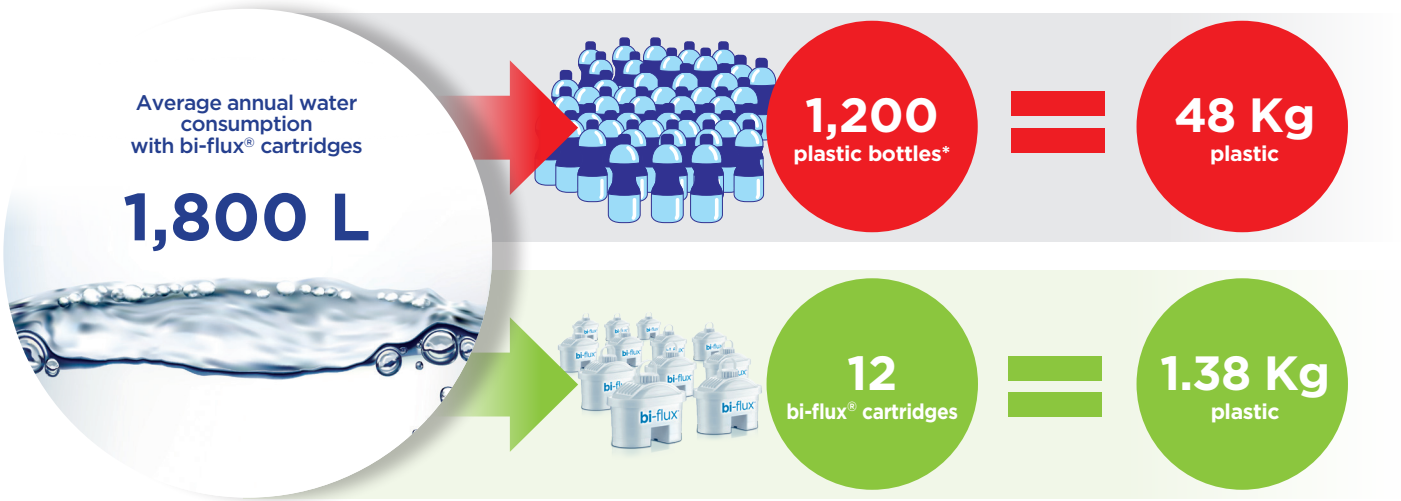

(the substances listed are not necessarily found in the mains water supply)

Filtration phases

The bi-flux® cartridge is environmentally friendly

Here is the environmental impact in one year of use of bi-flux® cartridges

*One year of filtered water with bi-flux® cartridges, corresponds to a saving of 1,200 1.5 L plastic bottles. By using bi-flux® cartridges you reduce plastic bottle consumption by:

-97.125%

The comparison is calculated on the basis of: 1.5 L plastic bottle (40 g) and bi-flux® cartridge (115 g), rounded values, January 2020 data.

bi-flux® filter cartridges

MAGNESIUMACTIVE magnesiumactive®

Increases the concentration of magnesium in tap water and reduces*:

- heavy metals
- chlorine
- trihalomethanes
- some pesticides and chlorinated herbicides

MINERALBALANCE mineralbalance®

Keeps the natural balance of mineral salts such as calcium and magnesium naturally present in tap water and reduces*:

- heavy metals
- chlorine
- trihalomethanes
- some pesticides and chlorinated herbicides

NITRATE

Special formulation for the reduction of nitrates.

It reduces*:

- nitrates
- chlorine
- trihalomethanes
- some pesticides and chlorinated herbicides

*if present in tap water

COFFEE & TEA

It effectively reduces water hardness, keeping coffee and tea appliances working better for longer. It also allows to reduce* unwanted substances such as some heavy metals, chlorine and its derivatives.

Enhance the taste of tea and coffee

LIMESCALE STOP

Specially formulated to effectively reduce limescale in the mains water supply. Ideal for hard water areas, it softens the water making it more pleasant to drink and improving the taste of both hot and cold drinks.

It effectively reduces*:

- limescale by up to 90%
- water hardness by up to 90%
- heavy metals
- chemical contaminants
- chlorine
- trihalomethanes
- some chlorine-based pesticides and herbicides

ALKA WATER

Innovative formula that increases the pH of mains water, making it alkaline (pH from 8 to 9.5).

It also effectively reduces:

- heavy metals
- chemical contaminants
- chlorine
- trihalomethanes
- some chlorine-based pesticides and herbicides

*if present in tap water

FAST DISK™ filter

The FAST DISK™ filter lasts for 120 L, the equivalent of 1 month of filtered water.

FAST DISK™

FAST DISK™ is a 100% Made in Italy filter that allows you to filter water instantly. Thanks to the activated carbon technology, it reduces chlorine, thus improving the taste of the water whilst retaining the mineral salts that are beneficial to the body and naturally present in the mains water supply.

- The FAST DISK™ filter reduces
- chlorine
 - pesticides
 - microplastics
 - organic chlorine-based solvents

(the substances listed are not necessarily found in the mains water supply)

Ultra-filtration systems for
safe water, free from unwanted
substances that may be present
in the tap water

Ultra-filtration

Ultra-filtration

The HYDROSMART+ METAL STOP filter lasts for 1,200 L equivalent to 4 months of filtered water.

**HYDROSMART+
METAL STOP**

HYDROSMART+ METAL STOP

The HYDROSMART+ METAL STOP tap filter retains the mineral salts naturally present in the mains water supply and efficiently reduces:

- heavy metals, especially lead and cadmium
- microplastics
- sand, rust and suspended particles
- chlorine
- herbicides and organic chlorinated pesticides
- organic chlorinated solvents

(the substances listed are not necessarily found in the mains water supply)

The HYDROSMART™ filter lasts for 900 L equivalent to 3 months of filtered water.

HYDROSMART™

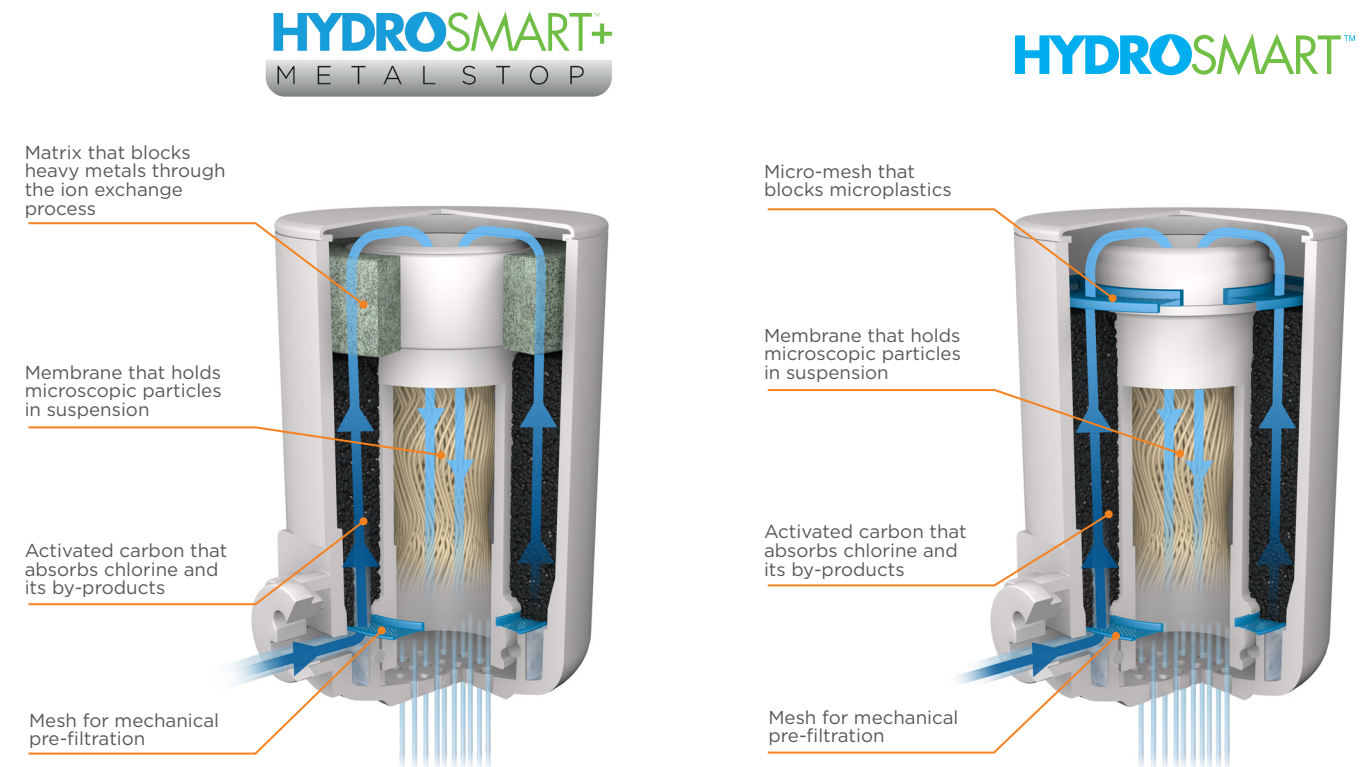

The HYDROSMART™ filter improves the taste of water keeping mineral salts* and reduces:

- microplastics
- chlorine
- Herbicides and chlorinated pesticides
- chlorinated organic solvents
- sand, rust and suspended particles

(the substances listed are not necessarily found in the mains water supply)

*naturally present in tap water

Filtration phases

Q.ty in master carton	: 36 pcs.

Ultra-filtration

The MikroPLASTIK-STOP™ filter last for 1000 L equivalent to 1 year of filtered water.

MikroPLASTIK-STOP™

The MikroPLASTIK-STOP™ filter is effective in mechanically blocking any plastic particles (diameter $\geq 0.1 \mu\text{m}$) that may be accidentally present in tap water. The filter also eliminates water cloudiness. The effectiveness of the MikroPLASTIK-STOP™ filter was tested by independent laboratories accredited in Italy and in Germany. The MikroPLASTIK-STOP™ filter blocks more than 99.5% of Microplastics with sizes $\geq 0.1 \mu\text{m}$ eventually present in tap water. For particles $\geq 1 \mu\text{m}$, the reduction rate is $\geq 99.99\%$.

MikroPLASTIK-STOP™ Jug

HOW DOES IT WORK?

Thanks to LAICA's innovative patented modular system, the effectiveness of the bi-flux® cartridge is complemented by the MikroPLASTIK-STOP™ filter that can block particles with a diameter ≥ 0.1 µm.

- 1

Pour Tap Water
Tap water can sometimes be contaminated with unwanted substances such as microplastics.
- 2

The bi-flux® cartridge reduces the hardness of the mains water, preserving the mineral salts that are useful to the body. It also reduces chemical contaminants, heavy metals and chlorine that may be present in the mains water.
- 3

The MikroPLASTIK-STOP™ filter this is a filter created with a special technology capable of blocking small particles with a diameter ≥ 0.1 µm.
- 4

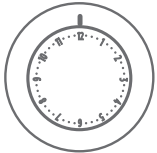

Filtered water
Enjoy all the pleasure of safety.

Tap Water
Tap water can be contaminated by bacteria,
heavy metals, pesticide residues and
herbicides or other chemical contaminants.

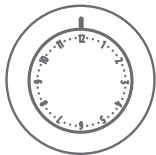

bi-flux® filter
LAICA's bi-flux® filter reduces chemical
contaminants, pesticides, herbicides and heavy
metals that may be present in tap water.
The LAICA bi-flux® filter lasts for
60 days / 150 litres of filtered water.

Germ-STOP™ filter
The Germ-STOP® LAICA filter has been
created with special technology that can
block bacteria and eliminate water turbidity.
The Germ-STOP® LAICA filter lasts a
variable amount of time depending on the
turbidity level of the tap water.
It reduces 99.999% of bacteria*.
